Kanagavel Krishnasamy **kanagu2win@gmail.com**

Technical Lead **+91 - 9159122426**

Tata Consultancy Services

Professional Summary

Technical Lead with 10.5 years of experience in developing applications using Java, Spring Boot, Microservices, and related technologies. Proven expertise in all phases of the software development lifecycle, from requirements gathering to deployment. Skilled in leading teams, implementing best practices, and delivering high-quality solutions that meet client requirements.

Technical skills

Java/J2EE Technologies	:	Java (JDK 21), Spring Boot 3.4, Microservices, Spring MVC, Spring AOP, RESTful API, Spring Security, Spring Core, Servlets, JSP, Junit, Hibernate, Spring Data JPA, Thymeleaf.
Other Technologies	:	SQL, HTML, CSS, Java Script, Jquery, AJAX, VB.NET, VBA (Excel Macro)
Messaging and Queuing	:	Kafka, Webclient, Restclient, Feign client
Database	:	Postgresql, Oracle, MySQL, Microsoft SQL, MS Access.
Code Quality & Deployment	:	SonarQube, Sonarlint, ELK , Jenkins, kubernetes, AWS
Data analysis & visualization	:	Infogix, Tableau
Tools	:	Git, Jira, Confluence, Postman, Swagger, Eclipse

Working Experience

- **Tata Consultancy Services** (TCS), Bangalore
  Technical Lead | July 15, 2024 – Present
- **IBM**, Bangalore
  Application Developer | July 3, 2020 - July 5, 2024
- **Cognizant Technology Solutions**, Coimbatore
  Programmer Analyst | June 20, 2014 - June 26, 2020

Education:

- M.Sc. in Information Technology, 2016, 75.00%
- B.Sc. in Information Technology, 2014, 85.00%
- Higher Secondary Education, 2011, 88.08%
- S.S.L.C. (Std. X), 2009, 90.60%

Professional Experience:

1. **Tata Play**

Role	:	Tech Lead
Software	:	Java, Microservices, Spring Boot, REST API, Spring AOP, Spring Security, Junit, SonarQube, Sonarlint, ELK , Jenkins, kubernetes, AWS
Team size	:	15
Duration	:	Jul 2024 to Till

Project Description:

Developing the Rest API's for Partner Relationship Management (PRM) system which is migrating from Oracle Siebel CRM system, it is a backend business logic solution designed to help businesses manage their relationships with partners. These partners can be distributors, resellers, affiliates, or any other third party that collaborates with the company to sell products or services.

Responsibilities:

- Led a team of 15 developers in the design, development, and deployment of microservices-based applications using Spring Boot.
- Conducted code reviews, provided technical guidance, and mentored junior developers.
- Architected and implemented RESTful APIs for seamless communication between microservices.
- Implemented and maintained CI/CD pipelines using Git & Jenkins to automate build, test, and deployment processes.
- Utilized Docker and Kubernetes for containerization and orchestration of microservices, improving scalability and reliability.
- Designed and implemented database schemas and optimized queries for performance using PostgreSql and Oracle.
- Collaborated with product owners and stakeholders to define project requirements and deliver high-quality software solutions.

- Implemented monitoring and logging solutions using ELK and grafana to ensure application stability and performance.
- Successfully delivered 2 key projects on time and within budget.
- Implemented messaging queues using Kafka to create asynchronous communication between services.
- Worked with cloud services like AWS EC2, S3, and Lambda.

2. Elevance Health (IFSI, IFSS, SUBRO,KYMED)

Role	:	Application Developer
Software	:	Java, Spring Boot, REST API, Spring AOP, Infogix, Tableau, VBA
Team size	:	7
Duration	:	Jul 2020 to Jul 2024

Project Description:

Calculate Rebates from Accruals and IAC (Invoice, Adjustment, Collections). The first step is to gather the documentation associated with your invoices to customers and billings from vendors that surround the period in which you are converting. This information is required to identify receivables and payables that will need to be accrued in the books and records that go beyond the traditional bank statement activity

Responsibilities:

- Developed Infogix controls, Tableau dashboards, and VBA macro-based automation tools based on detailed business requirements.
- Ensured code quality and adherence to standards through rigorous development practices.
- Created comprehensive technical design specifications.
- Participated in daily status, defect, retrospective, and grooming calls.
- Analyzed system configurations and aligned with evolving business needs (Waterfall).
- Performed deployments and testing in development environments.

3. Anthem – (Financial) IFSI Voyager 2020 & IFSS

Role	:	Programmer Analyst
Software	:	VBA Macro, VB.NET, Mainframe Automation(NASCO, Reflections)
Team size	:	1
Duration	:	Jun-2018 – Jun 2020

Project Description:

Calculate Rebates from Accruals and IAC (Invoice, Adjustment, Collections). The first step is to gather the documentation associated with your invoices to customers and billings from vendors that surround the period in which you are converting. This

information is required to identify receivables and payables that will need to be accrued in the books and records that go beyond the traditional bank statement activity

Responsibilities:

- Developed a data validator application using VBA macros, directly addressing business requirements and ensuring data integrity.
- Adhered to best practices and coding standards, maintaining high code quality and consistency.
- Created comprehensive technical design specification documents, facilitating clear project understanding and development.
- Actively participated in daily status, defect triage, retrospective, and product grooming calls, contributing to effective project communication and issue resolution.
- Analyzed existing system configurations and operating methodologies to align with evolving business needs, operating within a waterfall framework.
- Executed application deployments and conducted thorough testing in development environments, ensuring smooth transitions and minimizing potential errors.

4. Anthem – Pharmacy Benefit Management

Role	:	Programmer Analyst
Software	:	VB.NET(Multi-Threading), NASCO, Reflections, MS Access
Team size	:	1
Duration	:	Jun-2018 – Jun 2020

Project Description:

A pharmacy benefit manager (PBM) is a third-party administrator of prescription drug programs for commercial health plans, self-insured employer plans, Medicare Part D plans, the Federal Employees Health Benefits Program, and state government employee plans. According to the American Pharmacists Association, "PBMs are primarily responsible for developing and maintaining the formulary, contracting with pharmacies, negotiating discounts and rebates with drug manufacturers, and processing and paying prescription drug claims.

Responsibilities:

- Developed an end-to-end automation application using VB.NET with multi-threading, leveraging NASCO and Reflection frameworks, to fulfill specific business requirements.
- Adhered to best practices and coding standards, ensuring robust and maintainable code.
- Created comprehensive technical design specification documents, providing clear guidance for development.

- Actively participated in daily status, defect triage, retrospective, and product grooming calls, contributing to effective project communication and issue resolution.
- Analyzed existing system configurations and operating methodologies to align with evolving business needs, operating within a waterfall framework.
- Designed and implemented database tables and developed complex queries using Microsoft Access.
- Performed application deployments and thorough testing in development environments, ensuring smooth transitions and minimizing potential errors.

5. Anthem – Pharmacy Benefit Management

Role	:	Programmer Analyst
Software	:	Java, Spring Boot, Hibernate , HTML, CSS, Java Script, Jquery, Bootstrap, MySQL, Apache Tomcat.
Team size	:	3
Duration	:	Jan- 2015 – Jun 2018

Project Description:

Generate EDI enrollment implementation format test data to ANSI 834. The 834 is used to transfer enrollment information from the sponsor of the insurance coverage, benefits, or policy to a payer. The intent of this implementation guide is to meet the health care industry's specific need for the initial enrollment and subsequent maintenance of individuals who are enrolled in insurance products. This implementation guide specifically addresses the enrollment and maintenance of health care products only. One or more separate guides may be developed for life, flexible spending, and retirement products.

Responsibilities:

- Developed an end-to-end application using Java and Spring MVC, directly addressing business requirements and adhering to best practices and coding standards.
- Created comprehensive technical design specification documents, ensuring clear project understanding and development guidance.
- Actively participated in daily status, defect triage, retrospective, and product grooming calls, contributing to effective project communication and issue resolution.
- Analyzed existing system configurations and operating methodologies to align with evolving business needs, operating within a waterfall framework.
- Designed and implemented database tables and developed complex queries using MySQL.
- Performed application deployments and thorough testing in development environments, ensuring smooth transitions and minimizing potential errors.

Certifications

- Oracle Database 10g: Program with PL/SQL - Oracle Academy
- Microsoft Certified: Azure Fundamentals
- Spring Boot, Spring MVC – Udemy
- Hibernate - Udemy
- Kafka – Udemy
