SUMMARY

Experienced Java developer, adept at crafting efficient, scalable applications from complex requirements. Proficient in modern Java tech, delivering high-quality code on time. Strong problem-solving skills, passionate about staying current in the dynamic software industry. Collaborative team player, committed to continuous learning for innovative solutions driving business success.

EXPERIENCE

Senior Java Developer

Infosys **April 2023 - Present , Stockholm, Sweden**

- Serving as a Senior Java Consultant for Swedbank, leading the migration of their contact center to a Genesys cloud-based solution using cutting-edge technologies.
- Developed and implemented core features such as customer authentication via BankID and customer call surveys, significantly enhancing application performance.
- Collaborated with cross-functional teams to successfully launch the customer survey feature, improving customer feedback processes.
- Utilized Java 21, Spring Boot microservices, and JPA to build scalable and efficient backend services.
- Integrated Kafka for real-time data streaming and communication within the application.
- Leveraged Genesys Cloud to modernize the contact center infrastructure, ensuring seamless customer interactions.
- Employed OpenShift Cloud Kubernetes, Helm, Grafana, Prometheus, and Loki for container orchestration, monitoring, and logging.
- Implemented Junit and integration test cases, ensuring code quality and robustness.

Java Developer

Infosys **July 2020 - March 2023, Bangalore, India**

- Automated day-to-day warehouse management system for a USA-based client by developing REST APIs, streamlining inventory processes.
- Led the documentation of existing manual workflows, creating flow diagrams to facilitate the transition to automated processes.
- Developed and optimized UI components using Angular to enhance user experience and system efficiency.
- Utilized Java 17, Spring Boot, and RESTful Web Services to build robust backend solutions.
- Managed database interactions with Spring JDBC and Oracle, ensuring data integrity and performance.
- Collaborated using GitHub and TortoiseGit for version control, maintaining code quality and project consistency.
- Implemented front-end solutions with TypeScript and Angular, improving the application's responsiveness and usability.

Java Developer

HealtheLife **March 2019 - March 2020, Bangalore, India**

- Enhanced healthcare products by adding features such as staff organization and authorization management using RESTful services.
- Provided deployment support to clients, ensuring smooth implementation of healthcare products at their premises.
- Developed and maintained backend solutions using Java 11, Spring Boot, and Hibernate for robust and scalable applications.
- Managed database operations with PostgreSQL to ensure data integrity and performance.
- Collaborated using GitHub for version control, maintaining code quality and project consistency.

Software Trainee

Trisys IT **February 2018 - March 2019, Bangalore, India**

- Developed key features for a real estate project, including a shopping cart and site visit functionality, and contributed to the design and development of UI pages.
- Utilized Java 8, Servlet, and JSP to build and maintain dynamic web applications.
- Implemented front-end components using HTML, CSS, JavaScript, jQuery, and Bootstrap for a responsive and user-friendly interface.
- Managed data storage and retrieval with MySQL, ensuring efficient database operations.
- Collaborated using GitHub for version control, ensuring project consistency and code quality.
- Validated the project through coding, debugging, testing, and performing user acceptance tests to ensure functionality and user satisfaction.

PROJECTS

Genesys Cloud Integration Hub

Infosys - Swedbank • April 2023 - Present

- Implemented BankID login for customer identification, enabling secure access to the contact center using personal numbers.
- Developed a process to capture and store conversation details post-interaction between agents and customers.
- Created an API to trigger survey calls for eligible customer conversations, enhancing feedback collection.
- Wrote comprehensive JUnit, integration, and baseline test cases using Mockito and K6 frameworks to ensure code quality and performance.

- Optimized the application three times to handle increased load, improving scalability and reliability.
- Developed robust and scalable backend services using Java 21, Spring Boot, Microservices architecture, and RESTful Web Services.
- Utilized OpenAPI3 for API documentation and design, ensuring clear communication and standards compliance.
- Deployed and managed applications on OpenShift Cloud and Kubernetes, using Helm for package management and Grafana, Prometheus, and Loki for monitoring and logging.
- Managed builds and deployments with Gradle, Maven, Jenkins Pipeline, and Jira for continuous integration and delivery.
- Handled data persistence and retrieval with Oracle, using Git and Bitbucket for version control and collaboration.

Warehouse Management System

Infosys - Anheuser Busch • December 2021 - March 2023

- Automated a USA client's warehouse management system by developing RESTful web service APIs from scratch, streamlining inventory processes and enhancing efficiency.
- Led the documentation of existing manual processes, creating detailed flow diagrams to guide the development of RESTful services for automation.
- Developed and enhanced the user interface using React, ensuring a seamless and user-friendly experience.
- Migrated the existing project codebase from IBM Rational ClearCase to GitHub, improving version control and collaboration.
- Utilized Java 17, Spring Boot, Spring REST, and Spring JDBC to build robust backend solutions integrated with Oracle database.
- Implemented front-end components with TypeScript, Angular, Bootstrap, CSS, and HTML for a responsive and visually appealing application.

EHR-Network

HealtheLife • March 2019 - March 2020

- Enhanced healthcare products by implementing features such as staff organization and authorization management using RESTful services.
- Provided deployment support to clients, ensuring the seamless installation and integration of healthcare products at their premises.
- Developed and maintained backend solutions using Java 11, Spring Boot, and Hibernate for scalable and efficient application performance.
- Managed data persistence with PostgreSQL, optimizing database operations for reliability and speed.
- Collaborated using GitHub for version control, maintaining project integrity and code quality.

Zaasana

TrisysIT • February 2018 - March 2019

- Designed and developed home page, cart, and site visit pages using modern UI technologies for a real estate project.
- Implemented key functionalities such as cart, search, and site visits using Java 8 and Servlet to enhance user experience.
- Built dynamic web pages with JSP, integrating front-end elements using HTML, CSS, JavaScript, and Bootstrap for a responsive and visually appealing interface.
- Managed backend operations with MySQL and deployed the application on Apache Tomcat, ensuring smooth performance and scalability.

SKILLS

Java8, Java11, Java17, Java 21, J2EE, Spring Boot, Microservices, Restful Web Services, Hibernate, Spring, JPA, OpenAPI3, Kafka, OpenShift, Kubernetes, Helm, Grafana, Prometheus, Loki, Gradle, Maven, Jira, Jenkins Pipeline, MySQL, PostgreSQL, Oracle, MSSQL, Git & GitHub, Postman, JavaScript, CSS, HTML, Angular, React, Azure, AWS, GCP, Linux, Performance tuning

EDUCATION

Bachelor of Engineering in Computer Science

Rajiv Gandhi Proudyogiki Vishwavidyalaya • Madhya Pradesh, India • 2016
