Professional Summary

Senior Software Developer with **7+ years of expertise** in designing and delivering secure, scalable, and high-performance applications using **Java, Spring Boot, and Microservices**. Proven track record across **banking, government, education, and healthcare domains**, delivering solutions that enhanced **system performance, security, and scalability**. Adept at **microservices design patterns, API security, cloud-native deployments, and CI/CD automation**. Recognized for improving **transaction efficiency, backend performance optimization**, and enabling **enterprise-scale digital transformation**.

Core Competencies

- **Languages & Frameworks:** Java (8–17), Spring Boot, Spring Security, Hibernate, JPA
- **Microservices & Patterns:** Spring Cloud Gateway, Eureka, OpenFeign, Saga, CQRS, Resilience4j, API Rate Limiting, AOP Logging
- **Security:** JWT Authentication, RBAC, OAuth2, BCrypt, AES Encryption
- **Databases & Caching:** MySQL, PostgreSQL, Oracle SQL, Redis
- **Messaging & Streaming:** Apache Kafka
- **Cloud & DevOps:** AWS (EC2), Azure, Docker, Kubernetes, Jenkins, GitHub, Bitbucket, Config Server, SonarQube
- **Monitoring & Tracing:** Actuator, Micrometer, Sleuth + Zipkin, Prometheus + Grafana
- **Testing & Documentation:** JUnit 5, Mockito, Swagger, Postman

---

Professional Experience

Capgemini Technology Services India Ltd – *Senior Consultant*

Sept 2024 – Present | **Banking Domain** | Client: TU | Project: Managed File Transfer
Tech Stack: Java 17, Spring Boot, Microservices, Spring Cloud, Kafka, Redis, PostgreSQL, Docker, Kubernetes, AWS.

- Developed **secure REST APIs** for enterprise-level file transfer workflows, enabling seamless inter-bank transactions.

- Implemented **JWT-based authentication & RBAC**, ensuring compliance with banking security standards.
- Designed a **Rules Engine** automating file operations (decryption, malware scan, renaming), reducing manual effort by **40%**.
- Optimized performance with **caching, load balancing, and resilience patterns** (Resilience4j, Saga, CQRS), achieving **99.9% system uptime**.
- Integrated **distributed tracing & monitoring** (Sleuth, Zipkin, Micrometer), cutting debugging time by **30%**.

Uneecops Technologies Ltd – *Senior Software Engineer*

Aug 2023 – Jul 2024 | **Government Domain** | Project: Registrar of Newspapers of India (RNI)
Tech Stack: Java 8, Spring Boot, Hibernate, MySQL, Redis, Kafka, Docker, Kubernetes, AWS

- Built **backend APIs** for newspaper registration & regulation, serving **10,000+ daily users**.
- Designed **Help Desk & IMS modules**, improving query resolution speed by **35%**.
- Implemented **Kubernetes auto-scaling & optimized queries**, enhancing performance by **30%**.
- Secured APIs with **JWT + Kong API Gateway rate limiting**, ensuring compliance & data security.

Cybage Software Pvt. Ltd – *Software Engineer*

Nov 2022 – Jul 2023 | **Government Domain** | Project: Broadcast Seva Portal
Tech Stack: Java, JSP, ZUL, DIGIOV Architecture

- Built **modules for MSOs & Local Cable Operators**.
- Enhanced **workflows for broadcasting permission processes**, reducing delays.

Nityo Infotech Services Pvt. Ltd – *Java Developer*

Dec 2021 – Nov 2022 | **Banking Domain** | Client: PNB Bank | Project: Retail Internet Banking (RIB)
Tech Stack: Java, JSP, XML, FEBA Architecture, Oracle SQL Developer

- Enhanced **net banking modules** (fund transfers, KIMS, ASBA, FD/RD), used by **5M+ customers**.
- Optimized backend logic, reducing **transaction latency by 20%**.
- Implemented **RBI-compliant security enhancements**, cutting fraud risks by **15%**.

P2P System Pvt. Ltd – *Java Developer*

May 2018 – Dec 2021 | **Education Domains**
Tech Stack: Java, Spring Boot, Hibernate, Spring Security

- Developed **School ERP features** (attendance, inventory, report card generation), improving admin efficiency by **40%**.
- Delivered **custom ERP solutions**, adopted by **20+ institutions**.

Education

M.Tech – Information Technology | KSOU

B.Tech – Information Technology | MGM Noida (AKTU)
