Skills

Backend Development

Java 8, Spring Boot, Spring Batch, Spring Data JPA, Spring Framework, Microservices, Kafka, Junit 5, Cucumber BDD, SOLID principles, Software Design Patterns, Rest APIs, GraphQL, Spring Cloud, Spring Profile, Spring AOP, Webhooks, Apache Camel, JSP, Servlets, OpenAPI, Swagger, Spring Security

Database

MySQL, NoSQL, Oracle, MSSQL

Tools

Git, Jenkins, Postman, SonarQube , Maven, BitBucket, Jira, Confluence, IntellijIDE, EclipseIDE, Gradle, Kibana, Dynatrace, Kubernetes, Azure Devops, VS Code, Commercetools, Netflix Conductor

Deployment Environment

Azure Cloud, Amazon Web Services(AWS)

Frontend Web Development

Javascript, React.js, HTML5, CSS3

Awards

Star of the Month
Chain-Sys

Individual Excellence Award
BT

Summary

Currently, working as an Application Development Senior Analyst in Accenture with 7 years of experience in building scalable web and enterprise application. I specialize in designing high performance APIs, optimizing backend services using SOLID principles. Looking for professional growth that provides me the opportunity to leverage my technical and professional skills to grow along with the organization objectives.

Experience

Accenture — **April 2022 to Present**
Application Development Senior Analyst

- Designed and implemented backend APIs for integration with Buynet's in-house payment gateway, supporting card payments, Apple Pay, and Google Pay.
- Integrated an external finance provider as a payment option for the cart, enhancing payment flexibility.
- Created business logic to leverage existing features of external systems, such as Commercetool, for seamless product order placement.
- Built the service layer using SOLID principles, Singleton, Factory, and Hooks design patterns to ensure maintainability and scalability.
- Integrated OpenBanking features, enabling customers to select and add bank accounts for direct debit payments.
- Developed application code for a Spring GraphQL layer, acting as a facade for underlying microservices to streamline data retrieval and operations.
- Developing the REST APIs and microservices in an agile environment and worked throughout all the phases like analysis, design, development, unit and BDD testing.
- Leading the backend team and helping junior resources with project knowledge and experience.
- Collaborating with multiple teams for production deployments and delivery of features in every sprint.
- Working on connecting microservices using messaging services like Kafka.

ChainSys Corporation — **Jan 2020 to Mar 2022**
Software Engineering

- Developed the REST APIs in an agile environment and worked throughout all the phases like analysis, design, development, unit testing.
- Worked on migrating existing services to new secured frameworks.
- Involved in Code Reviewing and Code optimization to improve the performance of the project.

SSB Software Solution — **May 2018 to Dec 2019**
Associate Software Engineering

- Developed the REST APIs in an agile environment and worked throughout all the phases like analysis, design, development, unit testing.
- Developed the React.js application and connected with REST APIs.
- Responsible in writing UI component unit testing using Jest and Enzyme.

Education

MIT Campus, Anna University — **August 2013 to May 2017**
Bachelor of Engineering, CSE — 7.1 CGPA

Adhiyaman Martriculation School — **Jun 2011 to Apr 2013**
Matriculation — 94%

Goodwill Martriculation School — **Jun 2010 to Apr 2011**
Matriculation — 86%
